General Information

Short summary

The Company based in France has developed a Virtual Reality (VR) solution dedicated to Industries. Our solution is currently deployed within major industrial groups. By using it in their daily processes, our customers managed to gain efficiency and drastically reduce their operational costs through Virtual Reality. We rely on 15 years of experience in VR.

Full description

We are looking to set up a partnership locally to address the market. We need a 3D system integrator with some knowledge in CAD and Industry.

Advantages and innovations

Our solution is a complete solution designed to transform traditional industrial production methods by integrating virtual reality technologies into product design cycles. Collaborating in a virtual environment, training on advanced technologies and design processes, switching from CAD to VR is now possible thanks to the VR capabilities of our SkyReal VR solution.

It enables to run key industrials analysis in VR such as:

Collaborative design review, production planning validation, ergonomics, immersive sales, operator trainings.

Technical specification or expertise sought

The company is looking for two kind of partners :

- Engineering and consultancy companies with experience in 3D consulting & support for clients in the Aerospace, Automotive, Maritime, Energy and Manufacturing sector.
- System integrators.

Stage of development

Already on the market
