HandyShower can be used as a shower, a faucet or a bidet/shattaf. It is equipped with an interchangeable nozzle system which allows for quick assembly depending on the need. The whole kit fits in a small sachet and is available for purchase.

The device operates battery-free and is compatible with any other water container. It helps maintain basic hygiene even in extreme conditions.

## Features of HandyShower:

 **Water-saving** Our patented self-closing valve mechanism allows for full and precise control of how much water you use.

 **Multi-use** Thanks to HandyShower's nozzle swap, the device can be used as a faucet, a bidet or a shower.

 **Hands-free** A foot pedal allows for touchless use in the faucet function.

 **Portable** The most advanced kit ('HandyShower Premium +') weighs only 400 grams (0,9 lbs.) and is extremely compact – you can easily fit it in any luggage!
