Forwards:

This report provides an overview of trade relations between the EU and Japan in 2022. The report begins by analysing Japanese trade with the EU as a whole and then provides a country-by-country analysis of export trade between Japan and individual EU Member States. The report focuses primarily on the balance of trade between Japan, the EU, and its constituent Member States, and also provides a breakdown of goods traded between Japan and EU by category (i.e. chemicals, manufactured goods, food and livestock, etc.) in each case. The report also covers data on trade of services. Finally, it mentions some information about commemorative events and bilateral agreements that have been signed in 2022 between each Member State and Japan.

The report is based on statistics from the Japanese Ministry of Finance – Trade statistics of Japan. Therefore, values are expressed in Yen. The average exchange rate between Euro and Japan yen were:

In 2021: EUR 1 = JPY 138.03

In 2022: EUR 1 = JPY 142.87

The European Commission annually releases a report titled “European Union, Trade in goods with Japan”, expressed in Euro and covering the past decade providing the EU point of view of trade between the two areas.

The pdf version of the latest report is available here:

https://webgate.ec.europa.eu/isdb_results/factsheets/country/details_japan_en.pdf

EUROPEAN UNION (EU-27)

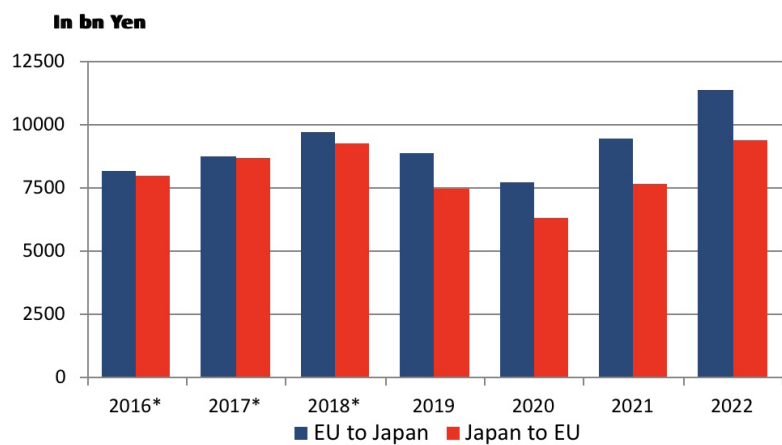

Population 1st Jan. 22: 446,828,803 (-0.0%)
GDP: 15,730,381 million € (+8.2% in 2022)

In 2022, trade between the EU and Japan experienced once again notable growth with a 22% increase in Japanese exports up to 9359 billion yen, and a 21% increase in EU exports, up to 11376 billion yen which set an all-time record in EU exports to Japan. It can be therefore said that 2022 was a profitable year for both Japan and the European Union.

EU's main exports consisted of chemicals (35.9%), and machinery & transport equipment (28.6%). Chemicals experienced a notable growth of 33.6% during the year.

Japan mostly exported machinery & transport equipment (62.3%) with a substantial increase of 62.9% and chemicals (12.3%) which increased by 13%.

In 2022, the EU-Japan Centre for Industrial Cooperation celebrated its 35th anniversary.¹

*Data for 2016-2018 include the United Kingdom. 2019-2022 are EU-27.

EU MEMBERS STATES AND JAPAN

Main EU partners (2022)

(In % of the total EU trade with Japan)

1. Germany (26.8%) unchanged from 2021	6. Spain (6%) up one's place from 2021
2. Italy (10.8%) up one's place from 2021	7. Ireland (5.7%) down one's place from 2021
3. France (10.5%) down one's place from 2021	8. Poland (3.5%) unchanged from 2021
4. The Netherlands (10%) unchanged from 2021	9. Sweden (3%) unchanged from 2021
5. Belgium (8.8%) unchanged from 2021	10. Czechia (2.5%) unchanged from 2021

Main EU exporters (2022)

(In % of the total EU export to Japan)

Main EU importers (2022)

(In % of the total EU imports from Japan)

Balance of trade Member States – Japan: export to import ratio (2022)

This graph represents the export to import ratio between the EU Member States and Japan in 2022. Values higher than 1 indicate a positive trade balance whereas values smaller than 1 indicate a negative trade balance.

According to the data, most of the EU countries recorded a positive balance in their trade with Japan in 2022. Just as of 2021, Cyprus remains the EU country with the least exports to Japan. Once again, Luxembourg and Netherlands also have experienced a significant trade balance deficit with Japan although the reason might be linked to their hub status, imports being then dispatched to nearby countries. On the other hand, Finland, Denmark and Latvia are the three top countries with the highest ratio which reflects a very positive trade balance.

Ratio of EU Japan EPA usage (2019-2021)

On 17 July 2018, the European Union and Japan signed an Economic Partnership Agreement (EPA), the biggest trade agreement ever negotiated by the EU. The agreement entered into force in 2019 and is expected to eliminate trade duties on 99% of goods exported between the two areas within 15 years from its entry into force. This graph shows the ratio of EPA usage by EU and Japanese companies during their export process. As shown above, the values have been steadily increasing. The data for 2022 was not available at the time of this report’s creation.

Trade of services between EU-27 and Japan (2016-2021)

This graph represents the import and export of services between the EU-27 Member States and Japan between 2015 and 2021. The data for 2022 was not available from Eurostat at the time of this report creation.

During the period, the data show an increase in trade of services between the two areas. In 2021 the EU provided services in Japan for a total value of 30 Billion euros (a 12% increase compared to the previous year), while Japan's services toward the EU grew to 15 Billion euros with a substantial increase of 21% recovering from the previous year's decrease.

Much like in 2020, the EU's main services provided to Japan included telecommunications, computer, and information services (34.6%) with an increase of 25.4%, other business services (21.8%) which decreased by 10%, and transport (12.6%) which experienced a 37.7% increase.

Japan service main exports shifted slightly from the categories of the previous year, in 2022 the main exports consisted of transport service (40.2%) which grew by 73.7%, other business services (34.4%) which instead decreased by 5.9% and in third position were charges for the use of intellectual property (10.7%) which increased by 14.8%.

Export of services between EU-27 and Japan:
