VINCENZO MICHAEL  
BATTAGLIA

#### Participant Profile

I started to work in C.L.S. in 2011 as designer and I improved my competences in various fields, especially in research and development to make growing continuously the standards quality and the optimization of the processes, which is something very important for the company as we are certified UNI EN9100 for aeronautic. During these years I have worked in an aerospace company as Product Manager, touching different fields, from the production, to the quality system, coordinating the human resources and look after customers relations. My competences are quite open because I have always worked in moderate dimensions Companies and this offered to me the opportunity to touch a lot of aspects of the chain. At the moment I also take care about the commercial area helping C.L.S. to open itself to new markets and be more visible to other countries. C.L.S. has a very good background in Italy and it is active also in Europe but my aim is to increase relations to other countries also out of Europe.

#### Company Profile

**Headquarters and branch locations:** VIA MONTE SAN MICHELE 25, 47122 FORLI' (FC) ITALY

**Shareholders:** -

**Mission:** C.L.S. develops and creates solutions always contemporary and innovative, giving absolute priority to customer needs and satisfaction. High skills and high performance tools unite with selected and special materials are the instruments used to obtain highly competitive services, and to be able to supply complex and special parts and systems.

EU-Japan Partnering Support Mission in the Space Sector - Tokyo, 9 – 11 March 2015

#### Technology portfolio:

**Turning area** with CNC machines till 7 axis

**Milling area** with 3-4-5- axis CNC machines

**EDM Cutting area** with wire EDM cutting machine

**Special processes area** with titanium anodizing system and Dry Film Lube process

**CAD/CAM** developing

**Engineering area** where we can provide projects and solutions for complex systems and innovative components

**Commercial footprint:** Europe

#### Value proposition for the Japanese market

C.L.S. has the know-how and instrumentations to develop products and complex system, from project to production, both by itself and with a network. We are able to coordinating different processes to supply a whole system to our clients. This could be interesting for Japanese Companies that would find new Italian Company network, C.L.S. could be the head commission to realize products, projects and solutions using its competences and using also the network.

We could produce parts from clients designs, but we can also project new solutions for our customers because we have knowledgeable people in engineering and developing.

Thanks to the moderate size of the Company, we are able to answer very fast to our customers and to invest energies in new projects like unique parts, prototypes and so on. We have huge flexibility in terms of analysis and study, to give quick and quality answers.
