

Recommendations to the Leaders of the EU and Japan

Working Party 4 Environment and Sustainable Development

Working Party Leaders:

Mr. Nobuhiro Endo
Chairman of the Board
NEC Corporation

Dr. Mark Pleško
President
Cosylab d.d.

15 May 2019

Introduction

- We have returned to the WP name "Environmental and Sustainable Development" we have used before
 - we believe that we can expand our discussion for new concrete problem solutions in the 21st century
 - We added new themes related to SDGs
 - "the urbanization problem" related to the increase of CO2 and air pollution
 - "high quality infrastructure necessary for sustainable development"

Recommendations (1-3/14)

1. Cooperate closely to promote the stabilisation of energy supply and prices in order to improve energy security, conservation and efficiency and address global warming
2. Achieving a stable supply of energy and cooperation with other countries
3. Challenge to build low carbon society

Recommendations (4-6/14)

4. Future direction of usage on nuclear power
5. Future direction of usage on renewable Energy
6. Smart Grid and convergence of Electric distribution networks with ICT

Recommendations (7-10/14)

7. Energy conservation & energy efficiency
8. Energy research and international cooperation
9. Efforts toward the prevention of global warming following the Paris Agreement reached at COP21
10. Promotion of resource efficiency and the circular economy

Recommendations (11-14/14)

11. Promotion of global investments and nurturing of long-term relationships
12. Initiatives and measures as a response to accelerated urbanization in the world
13. Challenge to solve social issues in new era
14. Support of sustainable finance
